

YUJIA HUANG

E-mail: yujiahuang.research@gmail.com | Web: <https://yujahuang.github.io/>

EDUCATION

2023–2027 Southwestern University of Finance and Economics
B.Sc. in Finance; Minor in Business Administration (most taught in English)
Honors Program in Mathematics

EXPERIENCE

Jul 2025–Sep 2025 Quantitative Research Intern, *BigQuant*
– Developed and deployed machine learning–based and high-frequency trading strategies across equities, ETFs, futures, and cryptocurrencies using GBDT models.
– Participated in the Huatai Futures platform bidding project; responsible for large-scale data cleaning, backtesting, and minute-frequency futures strategy replication.

Jan 2024–Apr 2024 Research Intern, *China Blockchain Research Center*
– Conducted investment research on modular Layer 2 projects like Manta; created a six-dimensional evaluation framework and formed a “cautiously optimistic” outlook.
– Analyzed on-chain data and market indicators (e.g., L2 dominance 77.2%, Celestia market cap +450%); tracked ZK ecosystem developments, achieving live trading returns over 300%.

PROJECTS

Mar 2025–Present Crypto Quantitative Trading Platform | Full-stack Developer
Closed-source project: Built a cloud-native crypto quant platform on a self-hosted cloud server, supporting web-based and third-party agent strategy development, backtesting, live trading, and data acquisition and storage.
– Built Vue 3 web app and Electron desktop (Monaco IDE, charts, Pyodide, 12-locale i18n); Node.js backend with live-execution services.
– Built Python data pipeline with PostgreSQL hot-data reads; C++ backtest and live-execution DevBox with historical/realtime APIs, sandboxed matching, and performance/equity-curve output.
– Delivered real-time strategy performance output and personal performance analytics for live deployment tracking.

AWARDS

Aug 2023–Sep 2023 WorldQuant Brain Infinity Champions 002 — Alphathon 2023 | 3rd
Built multi-factor models with heterogeneous data fusion (50+ Alpha factors), achieving Sharpe ratio > 1.9 and 70%+ active rate. <https://drive.google.com/file/d/1VVNLmBPgzn0Qh9H6XZxMrFm-jmJgg4fr/view?usp=sharing>

PAPERS

1. Network-Based Path Optimization for High-Frequency Cryptocurrency Arbitrage: Empirical Evidence
YUJIA HUANG. https://papers.ssrn.com/sol3/papers.cfm?abstract_id=6453880 (preprint)

COURSES & CERTIFICATES

Southwestern University of Finance and Economics
2025 Winter Optimization Theory (Convex Optimization)
2026 Spring Partial Differential Equations (PDE); Stochastic Processes
UC Berkeley & SWUFE
Mar 2026–May 2026 Numerical Analysis (Instructor: [Ming Gu](#))
Coursera
Aug 2024 Mathematics for Machine Learning — Linear Algebra [Certificate](#)
Oct & Dec 2024 Probability & Statistics for Machine Learning and Data Science [Certificate](#)
Jan & Nov 2025 Calculus for Machine Learning and Data Science [Certificate](#)

SKILLS

Programming: Python, Java, VBA, SQL (MySQL), C++, R | Other: Dune Analytics, Etherscan, and DeBank, WebSocket APIs | Languages: Mandarin (Native); English (Experienced)
