

CURRICULUM VITAE FOR YUJIA HUANG

B.Sc. Candidate in Finance

Research Institute of Economics and Management
Southwestern University of Finance and Economics
No.555, Liulin Avenue (611130)
Chengdu, Sichuan, China

Phone: +86 19382254612
Web: <https://yujahuang.github.io/>
 yujahuang /  yujia-huang
E-mail: yujiahuang.research@gmail.com

RESEARCH INTERESTS

Stochastic control; network optimization; market microstructure; decentralized finance; algorithmic trading.

EDUCATION

2023–2027 Southwestern University of Finance and Economics
B.Sc. in Finance; Minor in Business Administration (most taught in English)
Honors Program in Mathematics

EXPERIENCE

- Jul 2025–Sep 2025 Quantitative Research Intern, *BigQuant*
- Developed and deployed machine learning–based and high-frequency trading strategies across equities, ETFs, futures, and cryptocurrencies using GBDT models.
 - Participated in the Huatai Futures platform bidding project; responsible for large-scale data cleaning, backtesting, and minute-frequency futures strategy replication.
- Jan 2024–Apr 2024 Research Intern, *China Blockchain Research Center*
- Conducted investment research on modular Layer 2 projects like Manta; created a six-dimensional evaluation framework and formed a “cautiously optimistic” outlook.
 - Analyzed on-chain data and market indicators (e.g., L2 dominance 77.2%, Celestia market cap +450%); proposed strategic asset allocation, tracked market fluctuations and ZK ecosystem developments to identify technical risks and entry opportunities, achieving live trading returns over 300%.

PAPERS

1. Network-Based Path Optimization for High-Frequency Cryptocurrency Arbitrage: Empirical Evidence
YUJIA HUANG. (preprint)
https://papers.ssrn.com/sol3/papers.cfm?abstract_id=6453880

PROJECTS

- Mar 2025–Present Crypto Quantitative Trading Platform | Full-stack Developer
- Closed-source project:** Built a cloud-native crypto quant platform on a self-hosted cloud server, supporting web-based and third-party agent strategy development, backtesting, live trading, and data acquisition and storage.
- Built Vue 3 web app and Electron desktop; Monaco IDE, charts, Pyodide, 12-locales, i18n, dark/light themes; enabled real-time online strategy editing and backtesting.
 - Developed Node.js backend (auth, strategies, deployments); integrated live-execution services.
 - Built Python data pipeline with PostgreSQL hot-data reads and hybrid APIs for observation and backtest.
 - Built C++ backtest and live-execution DevBox: historical/realtime APIs, sandboxed strategy execution, simulated matching, and real-time performance/equity-curve analytics for live deployment tracking.

AWARDS

- Aug 2023–Sep 2023 [WorldQuant Brain Infinity Champions 002 — Alphathon 2023 | 3rd](#)
- Built multi-factor models with heterogeneous data fusion (50+ Alpha factors), achieving Sharpe ratio > 1.9 and 70%+ active rate.

COURSES & CERTIFICATES

Southwestern University of Finance and Economics

Sep 2025–Jan 2026 Optimization Theory (Convex Optimization)

Mar 2026–Jun 2026 Partial Differential Equations (PDE)

Mar 2026–Jul 2026 Stochastic Processes

UC Berkeley & SWUFE

Mar 2026–May 2026 Numerical Analysis (Instructor: [Ming Gu](#))

Coursera

Aug 2024 Mathematics for Machine Learning — Linear Algebra

Oct & Dec 2024 Probability & Statistics for Machine Learning and Data Science

Jan & Nov 2025 Calculus for Machine Learning and Data Science

[Certificate](#)

[Certificate](#)

[Certificate](#)

SKILLS

Programming: Python, Java, VBA, SQL (MySQL), C++, R

Other: Dune Analytics, Etherscan, and DeBank, WebSocket APIs

Languages: Mandarin (Native); English (Experienced)
